DECLARATION HAS TO BE FILLED ON COMPUTER

DECLARATION OF REALIZATION THE DIPLOMA THESIS

Diploma thesis subject in the Polish language:

~~prognoza hashtag~~ Predykca hashtagów w mediach spotecznościanych

Diploma thesis subject in the English language:

Hashtag Prediction in Social Media

Language of work .... English

**Thesis supervisor**..... Dr. Eng. Radoslaw Michalski

The aim of the work, as well as its scope or formulate of research problems:

The objective of the project is to predict the hashtag if it will famous or not in the next few days using theTwitter Dataset

Scope : Understanding the hashtag predicitons allow users to take advantages of the relevant hashtags in a way that can benifit to promote the buisness, marketting, politics. Also, it can act as a diffusion and contribute to cease the bad behaviour of the certian hashtags.

The initial structure of the work or its short description:

Twitter network is currently overwhelmed by massive amount of tweets generated by its users. To effectively organize and search tweets, users have to depend on appropriate hashtags inserted into tweets. Hashtags prefixs by # and a research shows that hashtags have been used for different purposes. Some people use hashtags to categorize their tweets. Others use hashtags to tag content related to disasters or special events such as elections. Having multiple pros and cons, hashtags also being implemented as a very powerful tool for the user. Therefore, it requires to have control over how the information is being spread. In this research, I will develop an algorithem which will allow the predict which hashtag will be famout in the nearest future using the defind/agreed dataset.
